Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-6, drawn to a system with a building, classified in class 182, subclass 82.
- II. Claims 17 and 18, drawn to a system, classified in class 182, subclass 70.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as set forth in claim 1 does not require a compartment for positioning in a ground with an upper opening. The subcombination has separate utility such as an extensible ladder for exiting a tunnel.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
